MARKET DEVELOPMENT ACTIVITIES

TECHNICAL OFFICE

Notice of Foreign Proposals Concerning Standards in Agriculture. Requests for copies or questions on proposed standards changes outlined below can be referred to Carolyn Fillmore Wilson, USDA Technical Office, Building 1072, BARC - East, Beltsville, MD. 20705; or telephone (301) 344-2651. As required of all signatories to the GATT Standards Code, the following notification of foreign proposed standards-related rules has been provided for the information and comment of interested agencies and firms. The Technical Office invites inquiries from anyone who believes that any of the proposed regulations notified under this heading could cause a trade problem. From time to time we also receive information through our embassies in foreign countries, as is the case this week. After reviewing a particular proposal, anyone interested in commenting on it should include the TBT Notification Number in their communication, if appropriate.

Finland - TBT Notification 86.114. The Finnish Ministry of Trade and Industry has announced a proposal (product covered - food products) which includes the maximum residue limits of contaminants and impurities in certain food products. If the permitted maximum residue limits of contaminants are not given in Annex 1, or in other rules or regulations, the limits recommended in Codex Alimentarius are applicable. This proposal will replace the earlier decisions of the Ministry of Trade and Industry on the subject which were notified under TBT Notifications 84.60 and 85.106. The objective and rationale for the proposal is consumer protection and human health. Final date for comments on the proposal is October 10, 1986.

Japan The Technical Office recently received a copy of the 1986 publication "Guide Book of Japanese Agricultural Standards for Foreign Business - Processed Foodstuffs" which we will be happy to share with interested parties.
